VACCINE INJURY: RECOGNITION, REMEDIATION, PREVENTION & ALTERNATIVES

Presented by:
Cindy L. Griffin, DSH-P, DIHom., DCIH, BCIH, FAAIM
www.HomeopathyHouston.com
DISCLOSURE

- We are not, and do not represent ourselves as medical doctors (MDs), nor are we licensed in any way to practice conventional medicine, chiropractic, psychology nor any other licensed (protected) profession.
- Homeopathy is an unlicensed profession in the State of Texas.
- Our credentials include at least 3 years of intensive study of homeopathy and its effects on the human body, including a study of human anatomy, pathology and physiology, in order to effectively analyze and recommend homeopathic remedies to our clients, which are then voluntarily self-administered.
- Nothing in this presentation is to be construed as medical advice on treatment, prevention, or mitigation of any disease. The viewer is advised to seek professional medical attention for any medical conditions s/he may be experiencing.
OUR “CRUSADE”

- To create awareness that vaccine injury is:
  - REAL
  - RAMPANT
  - REVERSIBLE

- To counter the well-funded and vested interests who are crippling our children, our elderly, and soon, all of our adults through blatant lies, coverups, hiding behind government shielding from liability, and smears, and misinformation campaigns

- To demonstrate that there are definite physical injuries caused by vaccines which are known and documented by the vaccine industry, FDA, and CDC

- To bring awareness of the efficacy and alternatives available through sequential homeopathy
HOMEOPATHY CENTER OF HOUSTON

Julianne Adams

Lynn Rose Demartini

Lindyl Lanham
WHAT YOU WILL LEARN
TONIGHT

• An overview of vaccine adverse events
  • From CDC, manufacturers, US government data
  • From medical studies of vaccines and their excipients
  • From our clients’ histories
• Some tidbits of vaccine history and dirty dealings.
• How to recognize vaccine injury – including, and in addition to autism
  • Many chronic illnesses and conditions from allergies and skin conditions to serious debilitating problems such as autism and paralysis
WHAT YOU WILL LEARN TONIGHT

- Insight into some of the mechanisms of vaccine injury
- An overview of how we can help vaccine injury
  - The approach
  - Some case studies
- How we can help if you are forced to vaccinate
- Alternatives to vaccination to maintain health
  - General self-care tips
  - Homeoprophylaxis
WHAT YOU WILL LEARN TONIGHT

• What the vaccine-government machine is doing now at the federal and state levels across the country to force everyone into vaccine mandates with no opt-out

• What you must do now to protect your health freedom to decide for yourself and your children whether/when to vaccinate

• Specific Oklahoma information from Oklahomans for Vaccine and Health Choice leader, Liza Greve
Many vaccines are being outsourced to Chinese manufacturers, with no inspections, no oversight and are given a “free pass” to bring them into the US and other countries by the World Health Organization.

“Most, if not all, of the seventy-two (72) Childhood Vaccines FORCED on California children in order to go to school are made in any of the twenty-eight (28) Chinese vaccine manufacturing facilities.”

VACCINE INJURY IS REAL

What FDA, CDC and manufacturers know about vaccine Injury - from their own sources
WHAT FDA, CDC AND MANUFACTURERS KNOW ABOUT VACCINE INJURY

SOURCES: CDC, FDA, Manufacturers of Vaccines
EVERY VACCINE DOES HARM

• Addition of injected toxins
  • Heavy metals (which are carried into the brain and vital organs by macrophages)
  • Glyphosate (Roundup®)
  • Animal, human and/or plant proteins whose DNA combine and create chronic inflammation

• Addition of immune burdens
  • Disease antigens (which create long term, chronic forms of the disease)

• Contaminants
  • Zoonotic diseases from animal proteins
  • Strep, staph contamination of multidose vials
  • Antibiotics (contributing to emergent abx resistant pathogens)
Aka “The Pink Book”

Appendix D:

- The Vaccine Adverse Event Reporting System (VAERS)
- The Vaccine Injury Compensation Program (VICP)
- Vaccine Injury Table
- Countermeasures Injury Compensation Program (CICP)
APPENDIX B: VACCINE EXCIPIENTS AND MEDIA

SUMMARY

Where vaccine injury begins

VACCINE PACKAGE INSERTS

• Contents:
  • Vaccine ingredients
  • Dosing information (one-size-fits-all!)
  • Contraindications and Warnings
  • Pre-release study information
    • Safety Testing Reactions and side-effects
  • Post-release reports of reactions
    • This is often where the most information is found on the genuine risks of vaccines
    • After release to the public, data is collected from VAERS
    • VAERS data is admittedly underreported
SOME HARMFUL ADDITIVES

- Aluminum
- Mercury (thimerosal)
- Animal cells
  - Chicken embryo (eggs)
  - Pig albumen (pathogens are zoonotic to humans)
  - Monkey cells
  - Dog cells in new flu vaccine: Flucelvax®
- Monosodium Glutamate (MSG)
  - Neurotoxic
  - Anaphylaxis
  - Excites, then destroys microglia in the brain
- Formaldehyde
  - Carcinogenic
- Human diploid cells (aborted human fetal tissue)
MORE HARMFUL ADDITIVES...

- Antibiotics:
  - Neomycin
  - Streptomycin
  - Polymyxin B
  - Gentamycin
  - Adding to emergent strains of antibiotic-resistant pathogens
  - Allergy potential
  - Fungal dysbiosis

- Peanut oil #65
  - Creates peanut allergies
- Yeast cells
  - Yeast proteins highly reactive allergens
- Genetically Modified Organisms (GMOs)
  - GMO viruses
  - The horizontal transfer of genes has never been safety-studied for either ingestion (GMO food) nor injection (vaccines)
AND MORE…

• Acetone (fingernail polish remover!)
• Formaldehyde (embalming solution)
• Phenoxyethanol (antifreeze)
• Dyes
• New study finds Glyphosate contamination in many common childhood vaccines.

• Glyphosate is ROUNDUP® - a potent herbicide now being ruled as a carcinogen, as well as other health hazards
• Manufactured by Monsanto
• Accidental contaminant, or intentional additive? Not listed, but in dangerously high concentrations. Should not be ingested, much less injected!
DOES THIS FEEL SAFE TO YOU?

- Monsanto makes:
  - Herbicides (Glyphosate or Roundup®)
  - Genetically modified seeds that are Roundup®-resistant for mass spraying of crop fields for weeds without killing crops themselves – which means crops contain Roundup®
  - Commercial artificial fertilizers, pesticides and more.
- Monsanto has been losing money from GMO awareness
- Monsanto has just been purchased by Bayer (yes, the “aspirin” company) for $66B
- So a company that makes its money from sick people needing its drugs (Bayer) just bought a chemical company that is losing money because people are finding they feel better when they avoid GMO foods, or eat organic foods (without chemical pesticides and additives)
NAZI GERMANY, 1930’S

- IG Farben: Large chemical corporations before World War 2.
- Acquired Bayer as a drug product company in 1925
- IG Farben manufactured the gas that was used for extermination of the concentration camp prisoners.
- IG Farben needed labor to build its massive manufacturing facility. It financed the building of Auschwitz and Dachau to provide a place to house the slave labor.
- The concentration camp “residents” were literally worked to death building the largest pharmaceutical and chemical plant in the world at that time, or were exterminated in gas chambers by its products when they were too weak to work.
NUREMBERG TRIALS

• After the trials of the Nazi conspirators and officers for war crimes, including medical experimentation by Dr. Mengele and his colleagues, IG Farben was broken up during the Nuremberg trials.

• The main successor companies that came out of that are today known as:
  • Bayer
  • BASF
  • AGFA
  • Sanofi
VACCINES, CHEMICALS AND GMOS

**Large Vaccine companies**
- GlaxoSmithKline
- Pfizer
- Merck
- Sanofi-Pasteur
- Novartis

**Chemical and GMO agribusiness companies**
- Monsanto
- BASF
- Pioneer
- Syngenta
- Dow Chemical
- Bayer
VACCINE ANTIGENS & VACCINE THEORY

• For the body to develop acquired immunity to disease, it must experience the disease.

• Vaccines provide an artificial, unnatural exposure to the to create a chronic form of that disease for which it is “immunizing”.

• Any symptom of the disease can be a “side-effect” of the vaccine for that disease.

• This applies to any vaccine
VACCINE ADJUVANTS

- Adjuvants purport to create a heightened immunogenicity (immune system response) to the particular vaccine antigen - theoretically.
- Immune regulation is not one-size-fits-all
- Adjuvants may easily act to over-stimulate the immune response, and permanently setting the system “on fire” – chronic inflammation is rampant (https://www.ncbi.nlm.nih.gov/pubmed/19880572)
VACCINES CONTAINING FRAGMENTS OF ABORTED FETAL TISSUE DNA

- Hep A/Hep B (Twinrix®)
- Hep A (Havrix®)
- MMR (MMR-I)}
- Varicells (Variax)
- Zoster (Shingles vaccine)

- Adenovirus
- DTaP-HiB (Pentacel®)
  (also fortified with calf serum!)
- Zoster (Shingles Vaccine)
Several researchers issue concerns about inflammation from human DNA fragments from aborted fetal tissue being injected.

Other researchers maintain that the human genome is actually shifting because of the uptake of DNA destabilizing it – based upon studies of individuals with autism.

This destabilization of the genetic makeup further predisposes towards vaccine injury or other environmental insults creating autism.

INFLAMMATORY DISEASES – VACCINE INJURY?

- Gulf War Syndrome (GWS)
- Rheumatoid arthritis
- Inflammatory Bowel Disease (IBS)
- Ulcerative colitis
- Crohn’s disease
- Chronic Fatigue
- Fibromyalgia
- Ear “infections”
- Pneumonitis
- Bronchitis
- Reactive Airway Disease
- Sinusitis
- Myofasciitis (muscle pain and inflammation)
- Eczema
- Heart disease
- Encephalitis
ALUMINUM ADJUVANT NANOPARTICLES (AAN’S)

- When injected can have delayed effects (https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4344667/)
  - Injected Al is absorbed by muscle tissue, can remain there for up to 8 years.
  - Aluminum adjuvant nanoparticles (AANs) are ingested by the macrophages, but break down very slowly.
  - Macrophages travel around the body and can cross the Blood-brain barrier (BBB).
  - Al inflames the brain – attracting more Macrophages – containing the aluminum.
AAN’S

- Aluminum has been used as an adjuvant in vaccines since 1920’s
- It is a known neurotoxin
  - May persist in muscle tissue for up to 8 years
  - May be ingested by macrophages, but doesn’t break down for years
  - Macrophages with aluminum can cross the BBB
  - Brain is sensitive to Al – creates more inflammation, attracts more macrophages
COMMON SYMPTOMS OF ALUMINUM TOXICITY

• Neurodegenerative demyelination syndromes
  • Autism
  • Alzheimers
  • ALS
  • MS
  • Parkinsonianism
  • Transverse Myelitis

• Skin disorders
  • Dry skin
  • Eczema

• Inflammation

• Asthma
MERCURY (THIMEROSAL VACCINE PRESERVATIVE)

• Thimerosal is 50% mercury by weight
• In 1999 the FDA requested that vaccine manufacturers voluntarily remove thimerosal from vaccines given exclusively to children. However, many are for both adults and children.
• The FDA considers any vaccine with <3mcg of thimerosal as "thimerosal-free" and lists most as "free" even though many still contain "traces" - amounts <3mcg.
• Vaccines that still contain >3mcg of thimerosal:
  • Flu Shots
    • Fluzone (multidose)
    • Fluvirin (multidose & single dose)
    • Afluria (multidose)
  • Hepatitis Shots
  • DTaP - Tripedia®
“SAFE” LEVELS OF MERCURY

• While the EPA has never determined that any amount of mercury is safe for humans, the FDA has stated that 25mcg is safe for infants and toddlers.

• With the giving of multiple vaccines, including those which are also administered to adults, therefore still contain mercury in high concentrations, children may quickly exceed that total by getting several vaccines in one day.

• Deduction: Mercury may be carried into the brain by the same mechanisms as aluminum.
Mercury Neurotoxicity

- Mercury (Hg) is equally neurotoxic as Aluminum (Al)
- Creates hypersensitivities to stimulus, and protective behaviors that may fulfill the description of “autism” - the withdrawal from social interaction, and into the self
- University of Calgary showed study of mercury effects in low concentrations on snail nerve tissue. It completely denuded the growing nerve tissue of its myelin sheath within a few hours. ([https://www.youtube.com/watch?v=XU8nSn5Ezd8](https://www.youtube.com/watch?v=XU8nSn5Ezd8))
- Remaining denuded cell tangle bundles are anomalies found in brains of both Alzheimer’s and autism victims.

Mercury gas is also constantly released from tooth amalgam fillings - then both inhaled and ingested, adding to the mercury load.
EXAM PLES OF MERCURY TOXICITY

- Inflammation and degradation of mucous membranes
  - Sinusitis
  - Allergic rhinitis (hay fever)
  - Bronchiolitis
  - “Wet” asthma and coughs
  - “Glue ear” – ear drainage

- IBS
- Crohn’s Disease
- Increases inflammatory cytokines, worsens any injury or weakened area
HUMAN FETAL TISSUE

- Human DNA fragments in vaccines have been associated with chronic inflammatory disorders.
- Fetal tissue DNA has been found in women with systemic sclerosis – a connective-tissue disease with production of autoantibodies which produces microvascular changes and skin cell damage (http://www.nejm.org/doi/full/10.1056/NEJM19980423381704#t=article)
- Can produce vitiligo in mice (http://www.pnas.org/content/96/6/2982.short)
- Concerns raised by some researchers that human DNA fragments may induce or accelerate autoimmunity
COMBINING INGREDIENTS COMBINES EFFECTS

- Mercury and aluminum are each potent neurotoxins.
- In combination they become far more synergistic, hence much more neurotoxic.
- Each of the vaccine “excipients” (the ingredients that are not the actual vaccine antigen ingredients) adds toxicity to the body burden.
- The more ingredients in the mix, the more the symptoms that can potentially be created.
- Virtually any vaccine creates damage, and adds to the toxic burden.
VACCINES AND SILICONE

• Silicone enters and inflames connective tissue
• Was used in breast implants (Dow lawsuits) which leaked silicone – created massive inflammatory and chronic fatigue disease syndromes
• Hep B vaccine is contraindicated (as are other vaccines) in Chronic Fatigue Syndrome or Fibromyalgia or demyelinating diseases, Gulf War Syndrome, or where silicone implants may have leaked (https://www.ncbi.nlm.nih.gov/pubmed/18725327)
• Silicone predisposes to vaccine injury
VACCINES CONTAINING HUMAN FETAL TISSUE, BLOOD PROTEINS AND DNA

- MMR II
- Chicken Pox (VARIVAX®)
- Chicken Pox and MMR (ProQuad®)
- Hepatitis A (Havrix®)
- Hepatitis A (Vaqta®)
- DTaP/HiB/Polio (Pentacel®)
- Rabies (IMOVAX®)
- Rabies (RabAvert)

Fetal cell line ingredients are designated as: Wistar RA 27/3, WI-38, MRC-5. A new addition is forthcoming: WALVAX 2 for viral vaccine production.
• M-M-R II®
  - Live virus vaccine
  - Evidence of 3.6X higher incidence of autism in African American males who were vaccinated under age 3 than those who were not vaccinated until age 3 was SUBVERTED BY THE CDC in 2004
  - In a statement released in August, 2014, Dr. Thompson stated, ‘I regret that my co-authors and I omitted statistically significant information in our 2004 article published in the journal Pediatrics.’ - (CDC Whistleblower, Dr. William Thompson)
VARIATION ON A THEME: MEASLES, MUMPS, RUBELLA AND VARICELLA VACCINE: PROQUAD®

- Live virus vaccine
- Adds in the Varicella (Chicken Pox) vaccine.
- Clinically, we have observed for nearly 20 years, that children who receive both an MMR and a Varicella in close timing appear more often to lose speech over those who have only the MMR.
- This increases significantly the difficulty of regaining speech with any form of treatment.
- Co-administration of a PCV seems to also increase the likelihood of apraxia, and is now common practice.
MEDICAL SCIENCE KNOWS:

- Persistent (chronic) measles active virus (titers)
  - Predisposes to persistent secondary infections with other pathogens
    - Most prevalent co-infections:
      - Herpes
      - Strep
    - Is associated with various demyelinating disorders
      - MS (associated with measles/HHV6)
      - Alzheimer’s
      - Autism
MMR POST-APPROVAL ADVERSE EVENTS

- Ear
  - Nerve deafness
  - Otitis media (inner ear infection)

- Eye
  - Retinitis
  - Optic neuritis
  - Papillitis
  - Retrobulbar neuritis
  - Conjunctivitis

- Urogenital System
  - Epididymitis
  - Orchitis

- Other:
  - Death

- Subverted:
  - Autism
## Rates of Hospitalization Among Infants Who Were Vaccinated with Multiple Vaccine Doses and Suffered an Adverse Event

AGE AT VACCINATION AFFECTS ADVERSE EVENTS

“... Of the 38,801 VAERS reports that we analyzed, 765 concerned infants six-weeks-old or younger who received one or more vaccine doses prior to the adverse event, and 154 of those infants were hospitalized: a hospitalization rate of 20.1%. Of 5,572 infants aged six months at vaccination, 858 were hospitalized: 15.4%. Of 801 infants who were nearly a year old when they were vaccinated, 86 were hospitalized: 10.7%. The hospitalization rate decreased linearly from 20.1% for neonates to 10.7% for older infants. Linear regression analysis of hospitalization rates as a function of patient age yielded an R squared of 0.95.
AGE AFFECTS DEATH RATE WITH MULTIPLE VACCINES

In the 38,801 VAERS reports we analysed, 26,408 infants were younger than six months. After receiving one or more vaccine doses, 1,623 of those infants died: a mortality rate of 6.1%. The remaining 12,393 infants were between six months and one year of age. After receiving one or more vaccine doses, 258 of them died: 2.1%. The mortality rate for vaccinated infants younger than six months was significantly higher than the mortality rate for vaccinated infants between six months and one year, with an RR=3.0 (95%CI, 2.6-3.4). Infants who had an adverse event reported to VAERS were significantly more likely to be hospitalized or die if they were younger rather than older at the time of vaccination."
VAERS ADMITS UNDERREPORRTING

• To access the data on the VAERS website, one must read and accept some disclaimers:

• “VAERS is a passive reporting system, meaning that reports about adverse events are not automatically collected, but require a report to be filed to VAERS. VAERS reports can be submitted voluntarily by anyone, including healthcare providers, patients, or family members. Reports vary in quality and completeness.”

• Doctors admit they do not like to file VAERS reports, and typically have been taught to deny the parental report that a vaccine reaction is what’s happened, and are not required to submit the VAERS report.
VAERS DATA CAN BE REPORTED BY ANYONE

• Doctors are not required to submit, but parents can, family members can, other practitioners besides the doctor who administered the vaccine can report to VAERS.

• Per VAERS website: “VAERS staff follow-up on all serious and other selected adverse event reports to obtain additional medical, laboratory and/or autopsy records to help understand the concern raised.”

• “Note that the inclusion of events in VAERS data does not imply causality.”

• Covering the government’s, industry’s and doctor’s...
LIABILITY – AND INCREASING THEIR LIE – ABILITY!
VAERS:

- VAERS Table of Reportable Events Following Vaccination
  - [https://vaers.hhs.gov/resources/VAERS_Table_of_Reportable_Events_Following_Vaccination.pdf](https://vaers.hhs.gov/resources/VAERS_Table_of_Reportable_Events_Following_Vaccination.pdf)

- Only small percentage of vaccine injuries are being reported. VAERS data reflects severe underreporting.

- Extrapolation of data from data that is blatantly underreported means that serious adverse events, and deaths, are quite possibly affecting millions of children.
VACCINE INJURY COMPENSATION PROGRAM: VCIP - “THE VACCINE COURT”

- Not a court at all – special masters govern
- Meant as a “no-fault” alternative to civil court
- Instead: Extremely difficult to qualify to be heard – only specific injuries: www.hrsa.gov/vaccinecompensation/vaccineinjurytable.pdf
- Burden of proof is on the victim, or victim’s family
- Since 1988, 17,308+ petitions file. 14,971 were heard.
- 4897 were compensated, for total of $3.4Billion
- Average payout so far - $694,300 per victim
VICP AWARDS TO DATE

- IN 2014, 542 vaccine injury claims were filed, only 365 were compensated, for total of $202M.
- The program is kept very quiet by the US government – they don’t want you to know!
- From 2014- June 2015 there was a 55% increase in cases the government “conceded.”
- Burden of proof is on the victim (or family of victim).
“Being awarded compensation for a petition does not necessarily mean that the vaccine caused the alleged injury. Over 80% of all compensation awarded by the VCIPP comes as a result of a negotiated settlement between the parties in which HHC has not concluded, based upon review of the evidence, that the alleged vaccine(s) caused the alleged injury.”

-VICP Compensation data report

DEFINITIVE VACCINE INJURY ADMISSION

• VACCINE PACKAGE INSERTS

• And – the required VIS (which are all greatly watered down and designed to
  • Minimize the risks, especially the “rare” serious ones – like autism, Gulf War Syndrome (which has to do with anthrax vaccine, not the Gulf War exposures), encephalitis, etc.
  • Imply that the parent who does not fully comply is putting his/her child at risk of serious illness or death. UNTRUE.
DTAP (DT IS NO LONGER AVAILABLE)

- Diphtheria/Tetanus/Pertussis
  - Tripedia®
  - Infanrix®
  - DAPTACEL®
- DTaP plus Hep B and Polio
  - Pediarix®
- DTaP plus Polio
  - KINRIX®
  - Quadracel®
- DTaP plus Polio and HiB
  - Pentacel®
Sometimes used clinically to reconstitute ActHIB, creating “TriHIBit” vaccine - to be used for the 4th childhood dose only.

From FDA vaccine data for Tripedia:

- A review by the Institute of Medicine (IOM) found evidence for a causal relationship between tetanus toxoid and both brachial neuritis and Guillain-Barre syndrome.
- A few cases of demyelinating diseases of the CNS have been reported following some tetanus toxoid-containing vaccines or tetanus and diphtheria toxoid-containing vaccines...
TRIPEDIA® ADVERSE EVENTS POST-APPROVAL BY THE FDA

“...include idiopathic thrombocytopenic purpura, SIDS, anaphylactic reaction, cellulitis, autism, convulsion/ grand mal convulsion, encephalopathy, hypotonia, neuropathy, somnolence and apnea.”

–Dec 2005

MMR

- **M-M-R II®**
  - Live virus vaccine
  - Evidence of 3.6X higher incidence of autism in African-American males who were vaccinated under age 3 than those who were not vaccinated until age 3 was SUBVERTED BY THE CDC in 2004
  - In a statement released in August, 2014, Dr. Thompson stated, ‘I regret that my co-authors and I omitted statistically significant information in our 2004 article published in the journal Pediatrics.’ - (CDC Whistleblower, Dr. William Thompson)
  - Recent analysis shows high concentrations of glyphosate (RoundUp®) contamination in Merck’s MMR-II®
Dr. Thompson is ready and willing to testify before Congress as to the wrongdoing at the CDC. But so far, Congressional oversight has been refused. Please encourage your US Senator and representative to subpoena Dr. William Thompson’s testimony.
BUT “THE SCIENCE IS CLEAR: VACCINES DON’T CAUSE AUTISM”

-Paul Offit, MD – vaccine developer and patent holder

-Mainstream media pundits – supported by drug advertising

-American Academy of Pediatrics
OUR "SHORT LIST" OF VACCINE INJURIES – OR VACCINE-CONTRIBUTION INJURIES
CHRONIC DIGESTIVE PROBLEMS FROM VACCINES

- IBS (MMR, Rotavirus)
- Crohn’s Disease (MMR, Rotavirus, mercury)
- Intussusception (Rotavirus - both retracted and current forms)
- Diarrhea (MMR, Rotavirus, Yellow fever, DTaP, Typhoid, Typhus)

- Reflux
- Ulcers (mercury)
- Food sensitivities
- Fungal dysbiosis (mercury, antibiotics in vaccines, and oral abx)
SECONDARY RESPONSES TO DIGESTIVE PROBLEMS

Behavioral
- Picky eaters
- Quick to tantrum
- Anorexia
- Sensory issues to foods
- Head-banging (Severe gut pain)

Physiological
- Reflux
- Constipation (chronic)
- Diarrhea
- Both, alternating
- Dysbiosis, fungal imbalances
- Food intolerances and allergies
PEYER’S Patches Inflammation Spiral

- MMR, Rotavirus, PCV (strep) can inflame GALT - the Peyer’s Patches →
- Immune reactivity →
- Systemic inflammation →
- Nervous system inflammation via vagus nerve →
- Nervous system reactions →
LEADING TO:

- Tantrums, meltdowns (usually pain reaction)
- OCD
- ADD, ADHD
- Anxiety
- Motor disorders
  - MS-like/Parkinson’s-like symptoms
  - Tics/Tourette’s
  - Tardive dyskinesia (DTaP, others)
- PANDAS (PCV)
- Autism (MMR most common triggering vaccine)
• Picky eaters (MMR)
• IBS
• Crohn’s Disease
• Diarrhea
• Constipation

• Alternating diarrhea and constipation
• Difficulty swallowing
• Textural sensitivity to foods
SKIN PROBLEMS FROM VACCINES

• Measles-like rash (MMR)
• Rubella-like rash (MMR)
SKIN REACTIONS

- Dermatitis (from Aluminum antigens)
- Eczema (from aluminum antigens)
- This and more photos can be found at http://www.medicinenet.com/image-collection/pityriasis_rubra_pilaris_picture/picture.htm
STOCK PHOTO OF A REAL CHILD WITH DERMATITIS
VACCINE INJURY: WAS IT THE ANTIGEN, ADJUVANTS OR ANTIBIOTICS IN THE VACCINE?

• From recent video on VAXXED Facebook page.
• We don’t know this answer, and it wasn’t our client but it resembles common reactions to various antibiotics such as Neosporin, which is in some vaccines.
ALLERGIC REACTION TO NEO MYCIN

Neomycin is in several vaccines.
EAR, NOSE, THROAT

- Earaches (PCV, HiB, Flu)
- Sinusitis (mercury, aluminum, Flu vaccines)
ALLERGIES AND HAY FEVER

- From mercury
- From aluminum
- From almost any vaccine containing either
• Asthma (esp. DTaP, PCV, aluminum)

• Chronic sore throat (PCV)
• Swollen tonsils (mercury)
• Swollen adenoides
LEARNING DISABILITIES

- Sensory Processing Disorder
- Dyslexia
- Handwriting problems (strep)
- ADD
- ADHD
EMOTIONAL IMPACTS

• Depression
• Fits of uncontrolled rage
• Aggressive behavior
• Brain fog (Hep A/B, Flu)
MANY ANXIETY AND PANIC ATTACKS ARE RELATED TO STREP

- Anxiety
- Fear states
- From PCV, esp. PCV13.
- From multi-dose vial contamination
MOVEMENT DISORDERS

- **Tics**
  - Vocal
  - Full body
  - Twitches
  - Eye-blinking
  - Swearing
  - Coughs

- **Choreiform movements**
  - Pill-rolling of hands
  - Rubbing of fingers, hands

- **Parkinsonian movements**
VACCINES PRONE TO CREATING NERVOUS SYSTEM INJURY

• MMR
  • Autism
  • Sensory Processing Disorder
• HPV
• PCV, esp. PCV13
• Meningitis vaccine
• DTaP
• Chicken pox vaccine
• Shingles vaccine
BRAIN AND CNS INFLAMMATION

- Encephalitis (DTaP, MMR)
- Encephalitic cry (incessant, unrelenting, inconsolable high-pitched shrieking)
- Seizures (DTaP, MMR, others)
- Autism, learning and developmental delays
- Paralysis
MUSCULO-SKELETAL INFLAMMATION

- Bone and joint arthritis
- Rheumatoid arthritis
- Fibromyalgia
- Myelofasciitis
- General aches and pains
- Specific areas of pain
  - Weakened from injury or wear
  - Vaccine excipients increase all inflammation
HPV VACCINE (GARDISIL, CERVERIX)

- Placebo was NOT placebo. It was everything else but the actual viral antigens.
- During the trial, several women died – before getting all 3 of the required doses.
- Their information was not included. Why?

- They did not complete the trial, so it didn’t count because they were... DEAD
SINCE ITS INTRODUCTION WORLDWIDE

Adverse events

• Hundreds of young women dead
• Thousands have suffered catastrophic neurological injuries
• Hundreds no longer can reproduce or are having severe reproductive dysfunction

Banned in...

• Japan
• Colombia
• Ireland considering a ban
HPV FOR BOYS: EQUALLY BAD IDEA

•

https://www.youtube.com/watch?v=CHYmb9Hwj4A
HE SPENT 88 DAYS IN THE HOSPITAL
CURRENT STATUS – PERMANENT INJURY

• Regained use of his legs
• Has some use of left arm
• Right arm paralyzed
• Diaphragm degenerated to the point that he will always have to be on a respirator.
• Attempted a diaphragm stimulator, but the degeneration precluded it working
• Must have neck brace – unable to hold head up.

• Took over 18 months of serious therapy to regain core strength and use of legs.
• The breathing apparatus weighs 15 lbs., and Colton cannot carry it himself from place to place – his arms cannot do it.

• **His doctors are still pushing for more vaccines!!**
• His doctor no longer gives HPV vaccines to boys
• **He is still offering them to female patients of all indicated ages.**

HOUSTON HOMEOPATHY METHOD: WE CAN HELP
• Virtually every problem mentioned as a vaccine side effect can be helped with homeopathy.

• Virtually every vaccine:
  • Adds to body burden of toxins
  • Adds to body burden of pathogens
  • Weakens and confuses the immune system
  • Has the potential to create an entire spectrum of problems and severities of those problems.
HOUSTON HOMEOPATHY METHOD

• But because most of our clients have had multiple vaccines, and often repeated administrations, they present with layers and complexities of symptoms.

• HHM is comprehensive:
  • Constantly strive for symptom relief quickly
  • At same time, able to work to remove the problems at causation
  • Works both chronologically backwards through an individual’s personal history at same time, giving real-time supportive and palliative remedies
FACTS REGARDING “VACCINE PREVENTABLE DISEASES”

- Most of the cases of these diseases are now occurring in fully vaccinated individuals.
- The childhood diseases are not all deadly in their wild forms. My generation had: Measles, Mumps, Chickenpox, Whooping cough. They were a rite of passage for immune system, not deadly.
- Following these diseases, esp. Whooping cough, most had developmental/growth leaps.
WHAT IS HOMEOPATHY?

• A holistic, or “whole body” approach to detoxification and healing
• A stand-alone system of healthcare
• Pharmaceutical and chemical-free
• Non-toxic
• Non-suppressive
• FDA regulated via the HPUS/HPCUS
• The fastest growing form of alternative healthcare
• Researched and developed by Samuel Hahnemann, M.D. (1755-1843)
• Believed in gentle, rapid, permanent healing
• Based on the “Law of Similars”
• Utilized “minimum dose”
• Achieved great success with deadly epidemics
• In late 1800’s in US, was crowding out conventional medicine of the time
HOMEOPATHY IN THE US

• Brought to US during cholera and yellow fever epidemics
• Early 1800’s-Homeopathic medical schools/teaching hospitals were established in US.
• 1844- American Institute of Homeopathy was formed.
• The first medical society in the US, the American Institute of Homeopathy, still operates today.
• In spite of attacks for decades, today enjoys a resurgence of popularity
• Many disenchanted MDs joining ranks or referring to homeopaths
HOW HOMEOPATHY WORKS

• Uses minimum doses of highly diluted substances
• Follows “The Law of Similars” -- Like treats like
• Homeopathic Materia Medica (body of knowledge) applied to match correct substances to similar symptoms
• Remedies work in harmony with our natural healing and life forces (a.k.a. The Vital Force)
• Remedies are energy medicine, not chemical medicine – speaks the body’s language
• Cannot add toxic or pathogenic burden
• Are able to signal the body to naturally restore balance, not force it to do something contrary to healing
• Is able to work across the Blood Brain Barrier – there is no Energy Medicine -Brain- Barrier
• Can address all levels of health: Mental and emotional as well as physiological
REMEDY SOURCES AND FORMS

• **Sources:** Derived from plants, minerals, metals, animals, chemicals, vaccines, or virtually any substance that can be ground or dissolved, and diluted.

• **Forms:** Liquid drops, sucrose medicated pellets, tablets, capsules, topical lotions and ointments.
HOMEOPATHIC DILUTION CREATES A GENTLE, SAFE, AND NATURAL APPROACH

• The serial dilution preparation of homeopathic medicines renders them non-toxic
• Facilitates overall self-healing – does not attack pathogens directly with strong chemicals
• No side effects
• Helps the body rebalance naturally to systematically restore equilibrium and health
SAFETY AND REGULATION

• In its entire history, homeopathy has never caused serious harm or death
• FDA regulates manufacture, labeling and distribution in the US, as well as any imported into the US
• Homeopathy is mainstream medicine in many countries around the world
Example: Red onion / Allium cepa

- Exposure Symptoms:
  - Watery eyes
  - Streaming nose
  - Desire for fresh air

- Allium cepa helps
  - Cold or cold-like symptoms
  - Hay fever symptoms
THE ONION AND THE VITAL FORCE

• The term Vital Force represents the living energies that govern, balance, and sustain all health and life.

• Examples:
  • The “immune system” (in medical jargon)
  • The energy to grow, repair, heal, and sustain life
  • The driving force for homeostasis in living cells

• The homeopath chooses the correct substances (e.g. bee venom for bee sting-like symptoms) and at the right dilution levels (potency) to resonate with the natural Vital Force to detoxify and heal the body

• It is possible to peel the layers of insult – and the vital force can then restore health.
HOMEOPATHY: SUPPORTING THE BODY’S INNATE SELF-HEALING ABILITIES

- Homeopathic remedies
  - signal body’s mechanisms,
  - support systems to do the work of detoxification and healing

- Homeopathy doesn’t chemically attack microbes

- They alert the natural defense mechanisms to work as designed:
  - Identify pathogens
  - Destroy or eliminate pathogens

- Pathogens can not develop resistance to homeopathic remedies.
WHY OUR APPROACH IS DIFFERENT

• Classical or Constitutional homeopathy seeks a single remedy that will eliminate all of a person’s symptoms and restore health
• Excellent for simple illnesses
• But today’s chronic illnesses are complex
• Single constitutional remedies can not always overcome the chemical burden and pathogenicity from the layers that build up
GERM THEORY IS NOT THE WHOLE STORY…

GENETIC SUSCEPTIBILITY + EXPOSURE = GENERAL SUSCEPTIBILITY
LAYERS PILE UPON LAYERS... UNTIL
SO WE EMPTY THE CART, A LAYER AT A TIME
HHM STEPS TO HEALING VACCINE INJURY

1. Pain Relief
2. Open the Detox Pathways
3. Daily supports of dysregulation
4. Peel back causational traumas
5. Address epigenetics
6. Support rebalance and healing

Emotional healing every step of the way.
OUR APPROACH ADDRESSES AND BODY CAN CLEAR AWAY:

**Toxins**
- Heavy metals
- Pesticides
- Herbicides
- Chemicals
- Drug residues
- Formaldehyde and other toxins from outgassing, exposure or vaccines

**Vaccines**
- Virtually any vaccine can be cleared homeopathically, except experimental vaccines.
  - Childhood vaccines
  - Adult vaccines
  - Travel vaccines
  - Military vaccines (most)
YOUR TIMELINE: ROADMAP TO RECOVERY

• We request a personal history:
  • Vaccine record (if available, if not, we can reconstruct)
  • Past traumas:
    • Physiological
    • Drugs taken (prescription or otherwise)
    • Chemical exposures
    • Emotional traumas
    • Accidents, surgeries, medical imaging and interventions
    • Dental work such as root canals

• This “Timeline” is only a map. It’s not WAZE®! Your symptoms will tell us when there’s a detour from the map. We follow the body’s priorities alongside the map.
Simultaneously we address current symptoms

- Pain relief is first priority
- Harm to self and others is critical to control ASAP
- Rashes, fevers, inflammation, earaches, etc.,
- Anything that is recent we can address fairly immediately to gain relief
- As we work through layers, old symptoms may briefly rise as part of the body’s own clearing process
  - Detox symptoms
  - Elimination symptoms
- We can relieve them and keep moving to clear all contributing factors
GAVIN: PERMANENT RECOVERY FROM SEVERE AUTISM

2004 2006 2009
STEPHEN: SUBTLE VACCINE INJURY
PREVENTING VACCINE INJURY
THE OBVIOUS ANSWER:

If it were me, I would consider not vaccinating.

But you must - and should be allowed the freedom - to be able to make and informed decision for yourself and your children.
BUT IF CIRCUMSTANCES DICTATE VACCINATION

• We can help!
• If you know ahead of time, even by a week or two, there are specific things that we can do with homeopathy to prepare the body for the impact of the vaccines.
  • Split up the vaccines into single vaccines per administration
  • Stretch out the time between those as much as possible
  • Detoxification ahead of time
  • Detoxification supports thru the vaccination process
  • After the fact, we can get things into your hands ASAP to immediately start the specific detoxification
NVIC.ORG: 
ASK 8 BEFORE YOU VACCINATE

1. Am I or my child sick right now?
2. Have I or my child had a bad reaction to a vaccination before?
3. Do I or my child have a personal or family history of vaccine reactions, neurological disorders, severe allergies or immune system problems?
4. Do I know the disease and vaccine risks for myself or my child?
5. Do I have full information about the vaccine’s side effects?
6. Do I know how to identify and report a vaccine reaction?
7. Do I know I need to keep a written record, including the vaccine manufacturer’s name and lot number, for all vaccinations?
8. Do I know I have the right to make an informed choice?

• If you answered yes to questions 1, 2, and 3, or no to questions 4, 5, 6, 7 and 8 and do not understand the significance of your answer, you may want to explore information on NVIC's website to better understand the importance of your answer. These questions are designed to educate consumers about the importance of making fully informed vaccine decisions.
ALTERNATIVES TO VACCINATION
COMMON SENSE

• Eat WELL
  • Organic as much as possible
  • Fresh, seasonal as much as possible
  • Avoid sugar, refined flower, additives, preservatives

• Exercise – BREATHE
• Balance work, play
• REST

• Supplements
  • Vit D3 (and/or 20 minutes/day of unprotected sun exposure
  • Vitamin/mineral supplements
  • REALLY good probiotics – without Strep thermophilis strain
CONSIDER
HOMEOPROPHYLAXIS
WHAT IS IT?

• Use of homeopathic remedies to prepare or “teach” the body what to do when it encounters a disease pathogen

• Has been used since homeopathy’s beginnings for epidemics like influenza, smallpox, plague, yellow fever

• Specific order of homeopathic remedy nosodes
BIGGEST PROPONENT

- Isaac Golden, an Australian homeopath
- Studied and documented 25+ years, over 3000 subjects
- Efficacy appears to be about 90% effectiveness
- His method has been taught through his books and formal training for almost 3 decades
INTERESTING OBSERVATIONS

• Also noted – the vaccinated were more likely to become ill than those who were not and used HP
• Those who were both vaccinated and had HP sometimes have a mild detox or elimination response to the remedies – a “clearing process”
• In families with vaccinated and unvaccinated children who all had HP, if they were exposed, typically the unvaccinated, HP only children either did not become ill or had a mild case of the illness
• Those exposed who had been vaccinated had a more severe case.
• Those who were vaccinated and did not have HP often became ill and had the worst case
“To those whose god is science, vaccination makes sense. But to someone whose god is God, vaccination is appalling.”

-Isaac Golden
MEASLES MORTALITY RATES/ 100,000 POPULATION AND VACCINE INTRODUCTION

SMALLPOX VACCINE EFFECTS: UK

England/Wales Smallpox Mortality Rates

*References: Record of mortality in England and Wales for 95 years as provided by the Office of National Statistics - Published 1997; Report to The Honourable Sir George Cornwell Lewis, Bart, MP, Her Majesty's Principal Secretary of State for the Home Department, June 30, 1860, p. a4, 205; Essay on Vaccination by Dr. Charles T. Pearce, M.D Member of the Royal College of Surgeons of England

Smallpox vaccine introduced in 1798

Data Gap

Smallpox vaccine made compulsory in 1853 (Compulsory Vaccination Act)

More stringent law passed in 1887

Deaths per 100,000

Year

1838 1841 1844 1847 1850 1853 1856 1859 1862 1865 1868 1871 1874 1877 1880 1883 1886 1889

Smallpox
Scarlet Fever
VACCINE PREVENTABLE?

• No vaccine has ever prevented an epidemic
• Most vaccines were introduced as the disease was dying out, and definitely after deaths to that disease were nearly eradicated by...
  • HYGIENE!
  • Modern methods of rehydration
  • Modern education about hydration, options for refrigeration
  • Modern clean water and plumbing
PUBLIC OPINION IS SHIFTING
CDC/VACCINE MANUFACTURERS PANIC

• American Academy of Pediatrics Survey released in late August, 2016
• 73.1% of parents refuse vaccines as “unnecessary”
• 87% of pediatricians responding report “vaccine resistance.”
• 72.5% of those parents delay or request alternate schedule due to “immune system burden” concerns
PUSHBACK IS COMING

• In 2015, 115 bills were introduced across 36 state legislatures to mandate vaccines for children, teachers, healthcare workers, daycare workers, etc. Most were struck down.

• Texas had 13 bills introduced in a one week period. All were either struck down or edited severely to maintain personal choice in vaccination.

• Oklahoma also had attempts to pass bills – more from Liza Greve on that.

• California passed SB277 which removed all exemptions except medical
PROPAGANDA AND TROLLS

• Fearmongering is increasingly necessary to “sell” vaccines
• Witch-hunts are ongoing against those to speak out against vaccines
• Doctors who will write medical exemptions in California are being made examples of, with trumped up charges of all sorts
• Online, various groups are hiring professional trolls to badger, intimidate and smear those who are speaking the truth that vaccines don’t work as advertised and in fact, are causing more harm than good in most cases.
2 pages of what a doctor must legally do BEFORE giving a vaccine:

- Provide a “Vaccine Information Statement” (VIS)
  - [http://www.cdc.gov/vaccines/hcp/vis/index.html](http://www.cdc.gov/vaccines/hcp/vis/index.html)

- Cautions the MD to give the VIS because “It’s Federal Law!”
  - “when people are not informed about vaccine adverse events, even common, mild events, they can lose their trust in healthcare providers and vaccines.”

- The VIS does not contain vaccine ingredients, nor complete side-effects list.
8 USE IN SPECIFIC POPULATIONS

8.1 Pregnancy Pregnancy Category C: Animal reproduction studies have not been conducted with INFANRIX. It is also not known whether INFANRIX can cause fetal harm when administered to a pregnant woman or can affect reproduction capacity.
MODERN MEDICINE’S APPROACH TO “DISEASE PREVENTION”
CDC NOTICE OF RULEMAKING

- Gives potential for draconian enforcement measures with vague language.
- Could essentially usher in “medical martial law” at the behest of the President’s executive order (unconstitutional) to give CDC power to both enact and enforce travel curtailments, checkpoints between states on roadways, in airports, train and bus stations, etc.
- Would allow unlawful “apprehension and detainment” of those suspected of having, being a carrier of, or having been exposed to a disease, with or without symptoms.
• Would allow unlawful “apprehension and detainment” of those suspected of having, being a carrier of, or having been exposed to a disease, with or without symptoms, for up to 72 hours without due process to observe them, or issue the option to quarantine, or force them to be monitored constantly by health departments.

• Could allow for forced vaccination or medical treatments with or without consent, or face potential criminal prosecution, long term detention (quarantine) or other unconstitutional measures.
PLEASE MAKE COMMENTS

CONTACT YOUR US SENATORS AND REPRESENTATIVE

• Call or visit, or write a letter by OCTOBER 14, 2016, to your elected federal representatives to make them aware of the situation and ask that they stop this CDC grab for your healthcare rights.

• Concern: if we do not stop it now, where will the line be drawn? Forced organ transplants? Forced euthanization for disease carriers? Job losses?

• It can happen and right now, if we do not stop, there will be no precedent left to slow it down.

## CDC List of Vaccine Adverse Reactions

<table>
<thead>
<tr>
<th>-Life-threatening severe illness with organ failure. More than half the people who suffer this side effect die.</th>
<th>-Severe allergic reaction to a vaccine component</th>
<th>-Severe nervous system reaction</th>
</tr>
</thead>
<tbody>
<tr>
<td>-Severe nervous system reaction</td>
<td>-Spreading of the vaccine virus to other parts of your body or to another person</td>
<td>-Accidental infection of the eye (which may cause swelling of the cornea causing watery painful eyes and blurred vision, scarring of the cornea, and blindness)</td>
</tr>
<tr>
<td>-Nausea, vomiting, diarrhea, or abdominal pain (about 1 person in 4) (up to 1 in 4 adolescents or 1 in 10 adults)</td>
<td>-Muscle or joint pain (up to 1 person in 2)</td>
<td>-Headache (about 1 person in 3)</td>
</tr>
<tr>
<td>-Nausea, vomiting, diarrhea, stomach ache (up to 1 in 4 adolescents or 1 in 10 adults)</td>
<td>-Body aches (about 1 person in 3 or 4)</td>
<td>-Pneumonia</td>
</tr>
<tr>
<td>-Inflammation of the stomach or intestines</td>
<td>-Seizure (jerking or staring) caused by fever</td>
<td>-Long-term seizures, coma, or lowered consciousness</td>
</tr>
<tr>
<td>-Permanent brain damage</td>
<td>-Fainting spells and related symptoms (such as jerking movements)</td>
<td>-Guillain-Barré Syndrome (GBS)</td>
</tr>
<tr>
<td>-Deafness</td>
<td>-Swelling of glands in the cheeks or neck</td>
<td>-Low platelet count, which can cause a bleeding disorder</td>
</tr>
<tr>
<td>-Fever over 102.2°F</td>
<td>-8 out of 10 became fussy or irritable</td>
<td>-Nausea</td>
</tr>
<tr>
<td>-Dizziness</td>
<td>-Hives</td>
<td>-Intussusception - a type of bowel blockage</td>
</tr>
<tr>
<td>-Chest pain or pressure</td>
<td>-Fast or irregular heartbeat</td>
<td>-Breathing problems</td>
</tr>
<tr>
<td>-Swelling of the brain or spinal cord</td>
<td>-Swollen lymph nodes</td>
<td>-Very high fever</td>
</tr>
<tr>
<td>-Behavior changes</td>
<td>-Swelling of the face and throat</td>
<td>-Difficulty breathing</td>
</tr>
<tr>
<td>-Weakness</td>
<td>-Swelling, severe pain, bleeding and/or redness in the arm where the shot was given</td>
<td>-Rash, swollen gland</td>
</tr>
<tr>
<td>-Severe brain reactions</td>
<td>-Swelling of the entire arm where the shot was given</td>
<td>-Low blood count</td>
</tr>
</tbody>

[http://www.cdc.gov/vaccines/vac-gen/side-effects.htm](http://www.cdc.gov/vaccines/vac-gen/side-effects.htm)
Contraindications

- Hypersensitivity to any component of the vaccine, including gelatin.\(^{[40]}\)

- Do not give M-M-R II to pregnant females; the possible effects of the vaccine on fetal development are unknown at this time. If vaccination of postpubertal females is undertaken, pregnancy should be avoided for three months following vaccination (see INDICATIONS AND USAGE, Non-Pregnant Adolescent and Adult Females and PRECAUTIONS, Pregnancy).

- Anaphylactic or anaphylactoid reactions to neomycin (each dose of reconstituted vaccine contains approximately 25 mcg of neomycin).
